## **RENEWAIRE PRESENTS “REDUCING LOADS WITH ENERGY RECOVERY VENTILATORS” SEMINAR AND INTRODUCES NEW PRODUCTS AT AHR EXPO**

*The HE Series’ HE15 and HE20 upgrades and the EV Premium+ control platform will debut at the New Product Theater and be displayed at RenewAire’s booth.*

**WAUNAKEE, WI** – [RenewAire®](#), WI-based [manufacturer of energy recovery ventilators \(ERVs\)](#) and [indoor air quality \(IAQ\)](#) products, will present at the new product seminar and exhibit new products at its [#SU525 booth](#) at the [2026 AHR Expo](#) (International Air Conditioning, Heating, Refrigerating Exposition), in Las Vegas, NV.

The [“Reducing Loads with Energy Recovery Ventilators”](#) seminar will be presented by RenewAire’s ERV Product Manager, Timin Musallam at Theater D in the Las Vegas Convention Center’s New Product Theater exhibit Feb. 2, 1:45 to 2:05 p.m. Musallam will explain how ERV technology can be applied to commercial and residential buildings to lower utility costs and reduce their environmental impact.

RenewAire will also introduce new ERV Series products and display other recently-developed models in its AHR Expo booth. The new products include:

- ♦ **HE15 and HE20**—[HE Series](#) upgrades of the former HE1.5X and HE2X indoor and outdoor commercial units, the [HE15](#) and [HE20](#) consume up to 34% less power than previous models. Features include airflow ranges from 369 to 2,200 CFM; standard direct-drive, backward-curved EC motorized impellers, and optional bypass economizers.
- ♦ **EV Premium+**—[EV Premium S, SH, M, MH](#) models with a “+” now designate the inclusion of a new proprietary control platform with cutting-edge smart logic and diagnostic capabilities that self-adjust for constant volume airflow and displays operational faults. The new control platform with the Touchscreen Control+ accessory complies with [2025 California Energy Commission’s \(CEC\) Title 24, Part 6 Fault Indicator Display requirements](#).

The other ERV products on display at the AHR Expo booth are:

- ♦ **Aeri™ Series**—North America’s first ERV constructed of a lightweight EPP foam enclosure that doubles as a cabinet structure and insulation. The Aeri Series’ labor-reducing lightweight, five smart constant airflow setpoints, and proprietary Snap-N-Go™ ductwork connectors make it a quick and easy install.

*RenewAire will feature its newest energy recovery ventilators (ERVs) at the 2026 AHR Expo, including the HE15 and HE20.*

- ♦ **HE05**—Winner of *Environmental Protection's* 2025 New Product of the Year for “Energy Efficiency/Renewable Energy,” the HE05 commercial ERV features an airflow capacity up to 375 CFM. With a 12.1” low profile and ceiling mount cabinet, this unit fits into most T-bar ceilings, crawl spaces, attics, and other confined spaces that other ERV brands can’t accommodate. The HE05 is ideal for various indoor installations in retail stores, dormitories, assisted living facilities, multi-family buildings, and other light commercial spaces.
- ♦ **SL75**—Engineered for installation in spaces where other ERVs can’t fit, the SL75 features a slim, low-profile cabinet with high-efficiency and energy-saving EC motorized impellers. The SL75 offers a CFM range of 30–130, and is ideal for multi-family applications.

Besides product displays, RenewAire will have many of its engineers and product managers on site at the AHR Expo to answer questions or demonstrate products.

#### **ABOUT RENEWAIRE**

For more than 40 years, [RenewAire®](http://www.renewaire.com) has been a pioneer in improving human health, cognitive function, productivity and wellbeing by enhancing indoor air quality via [energy recovery ventilation technologies](#). This is accomplished energy-efficiently, cost-effectively and sustainably with fifth generation static plate enthalpy core [energy recovery ventilators](#) and [dedicated outdoor air systems](#). For more information, visit [www.renewaire.com](http://www.renewaire.com), email: [ramarketing@renewaire.com](mailto:ramarketing@renewaire.com) or call (800) 627-4499.
